

Software Engineering Project Team 14

Meeting Notes

Team Member: Jiacong He, Qihui Li,
Haodong Liu, Qichen Pan

Meeting date: 2013/11/02

Accomplishment:

1. Discussed the whole system structure and workflow.
2. Learned the how to use Git branch to co-operate on the coding task.
3. Completed task division based on the phases of system workflow.
4. Present some potential methods to optimize the existing baseline system.

Assignment:

1. Read through all java codes in two projects to understand the structure of the baseline system.
2. Run the CPE pipelines to make sure that you successfully launch the baseline system from Git repository.
