

Software Engineering Project Team 14

Meeting Notes

Team Member: Jiacong He, Qihui Li,

Haodong Liu, Qichen Pan

Meeting date: 2013/10/30

Accomplishment:

1. Built the project repository in GitHub.
2. Learned the basic operations of Git in both command line and Eclipse.

Assignment:

1. Read the paper written by our TAs. "Building Optimal Question Answering System Automatically using Configuration Space Exploration (CSE) for QA4MRE 2013 Tasks". We will discuss it on Saturday. So please read through the whole text before next meeting.
2. Read the tutorial for hw5 "11791hw5.pdf" carefully, especially for Task 1.1 and Task 1.2.
3. Get more familiar with Git. You need to understand at least the meaning of "commit", "pull", "push", "branch" and "merge". Also, It is highly recommended for you to play with other features of Git.

Here are some useful resources. Please feel free to check them out.
